NICHINO AMERICA[®]

What MONCOAT MZ Offers

Superior, long lasting control of both seedborne and soilborne potato diseases to help deliver bigger yields and higher quality potatoes. MONCOAT MZ delivers excellent control of *Rhizoctonia*, provides added suppression of *Fusarium* dry rot and Silver scurf and reduces the spread of seedborne late blight.

NICHINO AMERICA*

Additional Benefits

- Systemic activity, providing protection throughout the plant and tuber set
- Extended residual control
- Long lasting preventative and curative activity
- Excellent yield and quality results
- Alder bark formulation helps speed the suberization process
- Excellent fit in resistance management programs

NICHINO AMERICA®

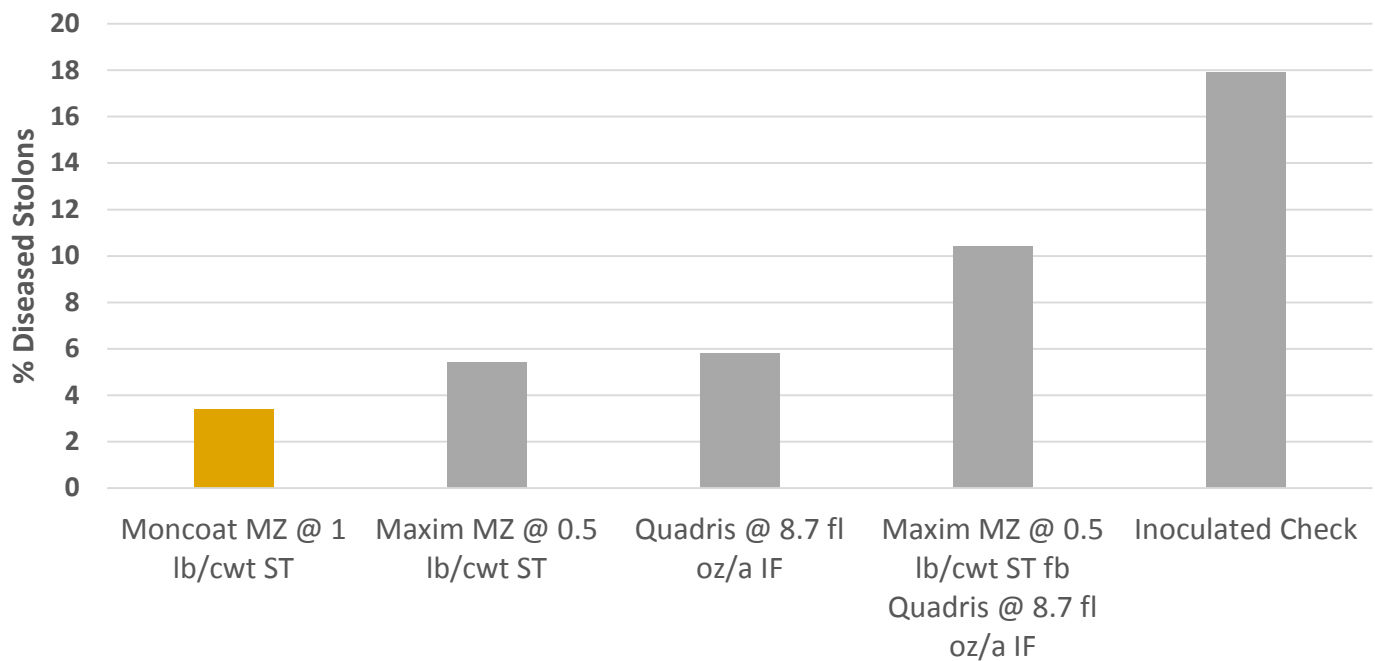

Recommendation

Seed-piece treatment: 0.75 to 1.0 lbs./acre

- Apply to the seed piece immediately after cutting.
- Use dispensing equipment that will give thorough coverage of the dust to the cut seed piece surfaces.

Rhizoctonia Disease Control 78 Days after Planting

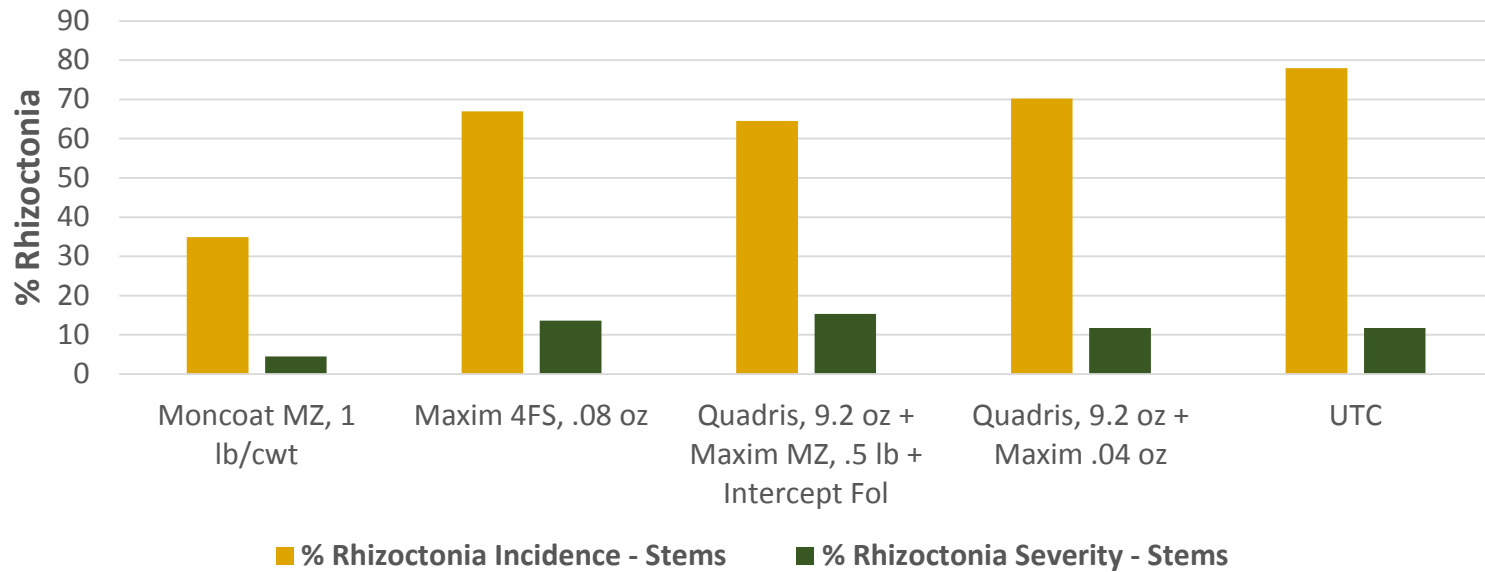

University of Idaho, Dr. Phillip Wharton, Aberdeen, ID 2013
