

FOR FAST CONTROL OF TOUGH BROADLEAF WEEDS

PREPLANT BURNDOWN

Pour in the Power of ETX Herbicide for a "BETTER, FASTER, STRONGER" Burndown Program

Benefits of Using ETX Herbicide

- ETX aids in controlling or suppressing weeds within hours of application.
- ETX provides improved control on kochia, Russian Thistle, morningglory, pigweed, and other tough weeds compared to when glyphosate, 2,4-D, dicamba, or glufosinate are used alone.
- ETX offers another mode-of-action herbicide to preplant burndown programs to aid in resistance management.
- ETX is a nonrestricted herbicide; no special training or equipment/PPE required.

Weed Control Programs

BURNDOWN

ETX @ 0.625 to 1.25 fl oz + glyphosate + crop oil

ETX @ 0.625 to 1.25 fl oz + 2,4-D + crop oil

ETX @ 0.625 to 1.25 fl oz + dicamba **or** glufosinate + crop oil

Use Recommendations

- Mix 0.625 to 1.25 fl oz ETX with preferred tankmix product.
- ETX is tankmix compatible with both preemergence herbicides and liquid fertilizer solutions.
- ETX should always be applied in combination with a NIS, MSO, or COC adjuvant. Always consult the label of the tankmix partner to ensure adjuvant selection is appropriate for both products.
- ETX is labeled for control or suppression on a broad range of weed species. ETX should be applied to actively growing small weeds that are less than 4 inches in height or 3 inches in rosette diameter.
- ETX is a contact herbicide and requires thorough coverage for optimum results. ETX must be applied with a minimum ground application volume of 10 gallons per acre. Higher application volumes provide improved results.

Application Window

- ETX has a zero day plantback for corn, cotton, soybeans, and wheat. It can be applied prior to planting, at planting, and post-plant (prior to crop emergence for corn, cotton, soybeans, and wheat).

Russian Thistle – 4 DAT*

Liberty 280 SL 43 fl oz/A

Liberty 280 SL 43 fl oz/A + ETX 1.25 fl oz/A

Kochia – 4 DAT*

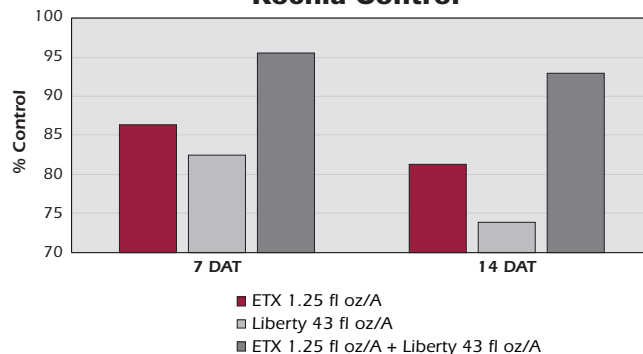

Liberty 280 SL 43 fl oz/A

Liberty 280 SL 43 fl oz/A + ETX 1.25 fl oz/A

* All treatments included 1% COC
