

For Control of San Jose Scale

APPLES

Centaur® Insect Growth Regulator delivers consistent and reliable performance against San Jose Scale. It is highly effective on multiple immature life stages, preventing scale from molting to the next stage. The active ingredient in Centaur, *buprofezin*, provides a unique mode of action to manage scale resistance in spray programs for apples.

Key Benefits

- Highly effective on multiple immature life stages of San Jose Scale
- Added benefit of leafhopper, mealybug, and soft scale control (including white peach scale)
- Long-lasting residual control
- Unique mode of action: IRAC Group 16
- Compatible with IPM practices

Use Information

- Use Rate: 34.5 oz per acre
- Use a minimum of 80 gallons of water per acre.
- Apply at delayed dormant to pink.
- Maximum of 1 application per year

San Jose Scale in Apples
